GP Batteries awarded Bronze Medal in EcoVadis sustainability assessment recognized again for exemplary sustainability practices

Gold Peak Technology Group Limited's (SEHK: 40) wholly-owned subsidiary, GP Batteries International Limited ("GP Batteries"), has garnered another accolade for its unwavering commitment to sustainability. In the latest EcoVadis sustainability assessment, the global leader in the battery industry was bestowed with the prestigious Bronze Medal, a testament to its exceptional performance among its global peers.

EcoVadis, a renowned sustainability assessment platform, conducted an exhaustive evaluation across four pivotal dimensions of sustainability - Environment, Labour Practices and Human Rights, Ethics, and Sustainable Procurement. GP Batteries not only surpassed the industry average but also outshined over half of the companies assessed worldwide. Notably, in the Environment category, GP Batteries secured a remarkable score of 70 points while the industry's mean score was 48. This achievement underscores GP Batteries' elevated standards and the resolute efforts invested in ensuring its sustainable practices.

The EcoVadis assessment meticulously incorporates internationally recognized standards including the Ten Principles of the United Nations Global Compact, conventions by the International Labour Organization (ILO), Global Reporting Initiative (GRI) standards, and the ISO 26000 standard. With over 100,000 companies evaluated under its purview, the EcoVadis assessment stands as a benchmark of sustainability excellence across the globe.

*GP Batteries awarded Bronze Medal in
EcoVadis sustainability assessment,
recognized again for exemplary sustainability practices*

Victor Chong, Executive Director of Gold Peak and President of GP Batteries, conveyed his heartfelt appreciation, stating, "I feel proud for our dedicated team and the collective efforts which resulted in this esteemed recognition by EcoVadis. This achievement corroborates our robust dedication to sustainability and underscores our profound responsibility towards safeguarding the environment. We remain resolute in our commitment to investing in sustainability initiatives and look forward to collaboratively nurturing a world that thrives for generations to come."

GP Batteries is a core part of Gold Peak Technology Group's business. The Group sees sustainability as a responsibility for business continuity and regenerative growth. This achievement marked a major progress made on recognizing Environmental, Social and Governance (ESG) as value drivers; and the Group's commitment to innovate, protect the environment, empower lives and motivate positive and sustainable change.

GP Batteries continues to ascend as a front-runner in championing sustainability within the battery industry. This latest accolade from EcoVadis is a testament to the company's unwavering dedication to fostering a greener, more sustainable future.
